Code review form

		Yes/No	Notes
1	Does the code run?		
	Run without errors (logical)	Yes	
	Input validated?	Yes	
2	Are all requirements/specifications for the code met?	Yes	
3	Did author plan code?		
	Pseudocode?	No	
	Flowchart?	Yes	
4	Are data types used correctly?		
	Does the application correctly convert between types if/when needed?	Yes	
5	Variables are used and named appropriately?		
	Descriptive / meaningful	Yes	
	Uses camelCase	Yes	
6	Is the code readable/understandable?		
	Is the code indented appropriately?	Yes	
	Are the comments adequate/appropriate?	Yes	
7	Methods are used and named appropriately?		
	Apply DRY principle.	Yes	
	Does one function	Yes	
8	Are Classes modeled appropriately?		
	Properties are appropriate?	Yes	
	Class methods appropriate?	Yes	
9	Are appropriate data structures used for storing/processing data?		
	List, Map, Set, etc.	Yes	Some redundancy with Hash Maps, where they are implemented but every fuction that uses it converts it into a List. Such as ProductDaoFileImpl.
10	Is the code built using MVC structure?	Yes	
11	Can the author explain Dependency Injection? (DI)		
	Can they explain how DI is implemented in their application?		
12	Are exceptions handled?		
	Good use of try/catch/finally blocks	Yes	
	Do they show too much information when thrown?	No	
	Are the appropriate exceptions caught?	Yes	

	Do custom exceptions respond appropriately?	Yes	
13	Is there a service layer?		
	Does the service layer contain only business logic?	Yes	
	Is the author able to explain the importance of the service layer?		
14	Is there testing for the code?		
	Can the author explain stateful / stateless testing?	Yes	
	Is there adequate testing coverage?	Yes	removeOrderTest had a coding error
	Is the Service layer tested?	Yes	
	Are the DAOs tested?	Yes	
15	Does the application use Lambdas and streams correctly?	Yes	
16	Are the IO/CRUD operations performed correctly?		
	Is appropriate data returned in appropriate format?	Yes	Accidentally allowed characters, such as ! to be included in names. (Should only allow letters, numbers, commas and full-stops)
17	Is author able to explain foundational elements of the Java language?		
	Abstraction, inheritance, polymorphism, encapsulation?	Yes	
	Can author explain how / why they coded a solution the way they did?	Yes
